COVID-19 Advice

The most common symptoms of coronavirus (COVID-19) are recent onset of any of the following:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness. However, if you have any of the symptoms above you should self-isolate at home and get tested

If you feel you cannot cope with your symptoms at home or your condition gets worse, please visit: <https://111.nhs.uk/covid-19>. If you cannot get help online, please call 111.

You can now ask for a test:

- for yourself, if you have coronavirus symptoms now (a new continuous cough, a high temperature, or a loss of, or change in, your normal sense of taste or smell)
- for someone you live with, if they have coronavirus symptoms
